TABLE OF CONTENTS

EDITORIAL. Page 527

ARTICLES

HEAT TREATING AT THE C. L. BEST TRACTOR PLANT. Page 531

Tractor parts requiring special hardness or toughness or both, whether of nickel-steel or high-carbon steel are heat treated, steel forgings and castings are annealed, and many mild-steel parts are casehardened. Annealing is also found to be of advantage for some cast-iron parts.

RECOMMENDED AMERICAN MERCHANT MARINE POLICY. Page 533

ACTIVITIES OF THE U. S. BUREAU OF STANDARDS. Page 533

FUNDAMENTAL PRINCIPLES OF SAFEGUARDING. By Sydney J. Williams. Page 534

Discussion by chief engineer for the National Safety Council.

SOME GAUGES AND TOOLS FOR AUTOMOBILE REPAIRING. Page 536

MANUFACTURE OF MACHINERY FOR THE FRUIT INDUSTRY BY THE ANDERSON-BARNGROVER COMPANY. Page 537

This is a Pacific Coast concern, which manufactures a varied line of canning, packing, and drying machinery, much of it specially designed to meet the customer's requirements.

SAFETY RULES FOR OXY-ACETYLENE WELDING. Page 540

ENGLISH COMPANY DEVELOPS PROCESS FOR ROLLING MANGANESE STEEL. Page 541

EFFECTIVE GUARD FOR AUTOMATIC SCREW-MACHINES IN HOLT MACHINE-SHOP. Page 541

'SPEEDING-UP' PRODUCTION ON AUTOMOBILE WORK. Page 542

The method of the Mann Manufacturing Co. as described in this article is to give a man the best equipment available and to pay him what he is worth.

BUILDING UP FOREIGN TRADE THROUGH STUDY OF SPECIAL REQUIREMENTS. Page 543

GAS AS A FUEL FOR RIVET-MAKING AND RIVET-HEATING. By Letson Balliet. Page 544

The advantage of gas as compared with either oil or coke are shown. Even though the nominal cost as expressed in b.t.u. per dollar is higher than for the other two fuels, the actual saving from the use of gas is large.

PROPOSED ASSOCIATION FOR RESEARCH IN ALLOYS. Page 546

WAR STORY OF THE AMERICAN RED CROSS TOLD IN ROUND FIGURES. Page 546

THE LOCOMOTIVE-CRANE FROM A SAFETY STANDPOINT. Page 547

The hazards caused by a poor road-bed, by overloading, particularly when the angle of elevation of the boom approaches the limit, and by poor lighting are among those emphasized.

NEW CHINESE STEEL PLANT. Page 548

SIAM'S TRADE IN METAL GOODS. Page 548

PYROMETRY IN THE STEEL INDUSTRY. By Richard P. Brown. Page 549

This article is devoted mainly to thermo-electric pyrometers. The importance of maintaining the cold junction at a fixed temperature, the best materials for thermo-couples, and various methods for automatic control of furnaces are the principal subjects discussed.

SOME DIES AND PUNCHES USED BY THE MARCHANT CALCULATING MACHINE COMPANY. Page 552

These dies are used for especially fine and accurate work. Unusual care is required in heat treating the punches.

GRINDING TRACK LINKS FOR THE 'CATERPILLAR' TRACTOR. Page 553

A disc grinder and paper with a thick coating of carborundum, cemented like an emery-wheel, are used.

NEW REQUIREMENTS FOR AEROPLANES. Page 554

INDUSTRIAL PHYSIOLOGY. Page 555

METALLURGY IN THE MANUFACTURE OF HIGH-SPEED STEEL. By Roy C. McKenna. Page 556

Mainly devoted to a discussion of the reasons for the various accepted trade practices.

Riveted Steel Tanks

We design, fabricate and erect cylindrical, rectangular, conical or round-bottom tanks for municipal, railroad or industrial service. Those who specify our steel tanks are assured of the best possible workmanship and immediate delivery. We are prepared to design, build and erect tanks to meet your particular requirements.

Riveted Steel Pipe

Riveted steel pipe is adapted to many uses, chief of which are municipal water systems, irrigation lines, hydraulic mining, and power lines. Its durability as compared with other types of pipe is unquestioned. The ablest engineers are now recommending its use where efficiency and low maintenance cost are desired.

Specify WESTERN of course

The favorable location of our three factories not only enables us to make prompt shipments, but also reduces the first cost through a reduction in freight. Your order will be executed at the factory from which the best rates can be secured.

ORONITE BRAND
PAINT
MANUFACTURED IN U.S.A. BY
STANDARD OIL COMPANY
(CALIFORNIA)

ORONITE PAINTS

Are Insurance Against Decay

A film of Oronite Paints on any structure, material or machinery keeps out all disintegrating forces. Used on surfaces of metal, wood, concrete or brick, Oronite Paints are an insurance against decay. They protect property perfectly from the weather, alkalis, acid fumes, salt water and stray electric currents.

Oronite Paints are made to conform to a high standard of quality. They are economical, too, covering a large surface per gallon. Each of the several Oronite Paints is made for a particular purpose.

Oronite Paint is a perfect preservative of all kinds of surfaces exposed to the weather.

Oronite Enamel Paint should be used to protect iron and steel surfaces from corrosion due to high temperature, acid fumes alkalis or salt water.

Oronite Roof Paint is a long wearing, economical coating for built-up or ready roofing, either new or old.

Oronite Aroturps is a perfect solvent and thinner for the drying oils in paints. It is better than turpentine and its drying time is about the same.

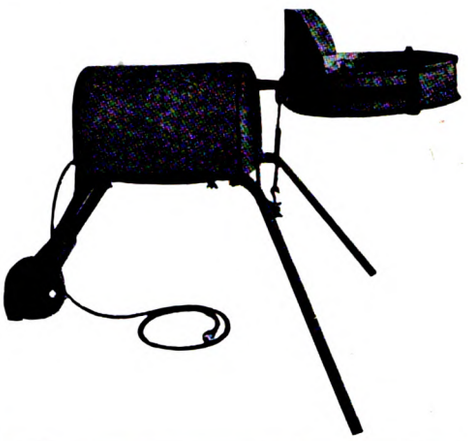
CHAMPION ELECTRIC SAND RIDDLE

SPEED—

The Champion will riddle as much sand in five minutes as a man can riddle by hand in one hour.



ECONOMY—

Costs less than two cents per hour to operate.

EFFICIENCY—

It has been adopted in most of the up-to-date foundries where efficiency is the by-word.

Let us ship you a "Champion" on trial. If after 30 days you do not think it is the greatest time and money saver made, ship it back to us.

Everything for the Foundries

EXCLUSIVE PACIFIC COAST DISTRIBUTORS

RIDDLES carried in both cities, and sent out on 30 days free trial. State current and voltage.

"PANGBORN" SAND-BLASTS

WILL CUT YOUR PRODUCTION COSTS

Do you know that Pangborn Sand Blast with one operator will clean ten times more metal than one man can clean by hand, and do it much better.

That all foreign substances, such as scale, rust, paint, etc., are entirely removed, and the virgin metal exposed.

And further a saving of twenty percent on tool steel is made due to avoiding of unnecessary drilling through sand scale.

These are a few reasons why Pangborn Equipment pays for itself many times over.

"There's a Type and Size for every need."

Don't feel that you are creating any obligation by asking information, we welcome your inquiries.

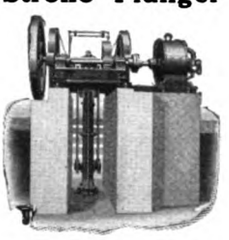
CENTRIFUGAL AND DEEP WELL PLUNGER
PUMPS

A Deep Well, Two Stroke Plunger Pump with a Low Centre of Gravity, to Reduce Vibration



Combined with an "American" all bronze, two-stroke water cylinder, this working head forms a pumping unit of high efficiency and great reliability.

The crankshaft is constructed similar to that of a heavy-duty triplex pump and transmits reciprocating motion to the plunger rods through crossheads and connecting rods, one connecting rod being used for the inside plunger rod and two for the outside rod.

The centre line of crankshaft is offset from the centre line of plungers to insure a more direct vertical pull on plunger rods while water is being lifted, thereby reducing wear and friction between crossheads and guides. Catalog 130A describes Deep Well Plunger Pumps and 149 Centrifugal Pumps.

Let "DITTY" Equip Your Foundry

A subject of vital importance to the Pacific Coast Foundryman

Modern Foundry Equipment is the only solution for the present high cost of manufacturing castings.

It reduces the cost from the sand heap to the delivery platform—and results in fewer returns.

In these and future days of the keenest kind of competition it behooves every Foundryman to give earnest consideration to this subject.

Many of the most modern foundries on the coast have been equipped by us.

We install labor-saving equipment and devices for all departments.

A FEW SUGGESTIONS:

Modern sand blast for the cleaning room—iron, steel and brass.

Electric core and facing sand mixers.

Modern moulding machines for the different classes of work.

Cinder mills for the reclaiming of iron and coke.

Electric riddles, core machines, cleaning mills, etc., etc.

We carry in stock a complete line of foundry facings, plumbagos, washes, core oils and dry binders, supplies, chaplets, shovels, brushes, bellows, riddles, fireproof clothing, etc, etc., and many types of modern equipment.

Our used foundry equipment department is very complete.

We completely equip Iron, Steel and Brass Foundries.

PRACTICAL ARMATURE AND MAGNET WINDING

By HORSTMANN and TOUSLEY

252 pp. **$1.00** **Cloth**

A comprehensive treatise for the workers; fully illustrating the principles and shop practice of armature and magnet work.

Treats particularly of the practical side of the subject; dealing with the theory of armature winding in a sufficient measure to enable the reader to comprehend fully why certain precautions and methods are necessary.

MINING AND SCIENTIFIC PRESS,
420 Market Street, San Francisco

Gentlemen: Enclosed find $1.00 for which send me one copy of "Practical Armature and Magnet Winding" by Horstmann and Tousley.

MEESECO DRIVES

A Perfect Short Center Silent Drive

A system of belt driving at short centers superseding high speed chains or gears - -

Write for Illustrated Bulletin No. 10

Specific Advantages of Meeseco Belt Drives

Short centers and saving of belt length - - - - -
Saving of space - - -
Saving of belt width -
Reducing the belt pull -
Reduction of bearing pressure - - - - - -
Prevents slippage -
Eliminates countershafts
High ratio possible - -
Application to long drives
Makes vertical belt drives possible - - -
